General Description:

Skin Calming Topicals help to manage your pet's skin allergies and other itchy conditions. These products contain a variety of natural ingredients that help to alleviate irritated, inflamed or sensitive skin. Skin Calming Topicals are available from your licensed veterinarian and are available in a variety of formulations including a spray solution, foam mousse, skin collars and spot-on treatments.

If your pet has a history of skin conditions, allergies or sensitivities, speak to your veterinarian regarding specific grooming product recommendations.

What is this product?

A collar or topical product to assist with management of sensitive skin

May contain a variety of ingredients including but not limited to:

Phytosphingosine: has anti-inflammatory and anti-seborrhea properties

Hinokitiol: a natural antibacterial and antifungal agent

Essential oils & essential fatty acids: help to restore the skin

Reasons for use:

Used to maintain healthy skin and assist with managing sensitive skin

For topical management of localized inflammatory conditions and pruritus

Decreases inflammation and itching, improves skin hydration and restores the proper skin barrier, helps regulate epidermal skin growth and keratinocyte production and controls bacteria and yeast populations

Use between baths to keep the active ingredients working against your pet's skin condition. Apply product emulsion over targeted area(s)

What animals should not use this product?

Many Skin Calming Topicals are available without a prescription (OTC/over the counter) but should only be used under the supervision of your veterinarian

Seek veterinary advice for any significant wounds/cuts/injuries as they may require more appropriate attention and the addition of other products or medications to prevent infection and promote healing

Animals with a known hypersensitivity or allergy to this or related products should not be administered this medication

Directions:

Read and carefully follow the dosage instructions provided by your veterinarian.

For collars, apply the collar to your pet's neck and adjust accordingly. Cut off any excess portion of the collar.

Remove before bathing. Replace the collar every 4 weeks.

Frequency and duration of use will be determined by your veterinarian based upon an assessment of how your pet is responding clinically.

For liquid products, shake bottle well before use.

Spray: Brush pet against the natural lay of fur, spraying this product by holding the pump ~12 inches from the pet's body. Concentrate spray over affected lesions, but do not over-apply. Apply to affected area twice a week, or as directed by your veterinarian.

Mousse:

Localized application: Apply on dry hair. Brush the hair coat. Dispense 1-2 pumps in the hand and then apply on the targeted area, massage into the skin until fully penetrated. Do not rinse. Let air dry. Once dry, brush the hair coat again.

Whole body application: Apply on dry hair. Brush the hair coat. Dispense 1- 2 pumps in the hand and then apply on the skin and hair. Massage into the skin until fully penetrated. Repeat as many times as necessary to cover the whole body, avoiding areas around the eyes and mouth. Do not rinse. Let air dry. Once dry, brush the hair coat again.

Spot-on: Using the small pipette, apply product between shoulders in 1-2 spots. Do not allow pets to lick or ingest the product

Skin Calming Topicals may be used as part of a long-term skin management plan as recommended by your veterinarian. The frequency and length of use of this product depends upon the condition being treated and your animal's response to the product.

If treating a potentially contagious skin condition, consider using gloves to apply this product and consult with your veterinarian about further measures to avoid spreading the infection.

This topical product should take effect quickly in about 1 to 2 hours, but its effects may not be visibly noticeable for a few days.

Avoid getting this product in your pet's eyes, nose or mouth.

After applying any topical product to your pet, wash your hands with soap and water.

What to tell/ask a veterinarian before using this product?

Talk to your veterinarian about:

How often your pet should be groomed

What are the risks and benefits of using this product

Tell your veterinarian about:

If your pet has experienced side effects on other drugs/products

If your pet has experienced digestive upset now or ever

If your pet has experienced liver or kidney disease now or ever

If your pet has experienced any other medical problems or allergies now or ever

All medicines and supplements that you are giving your pet or plan to give your pet, including those you can get without a prescription. Your veterinarian may want to check that all of your pet’s medications can be given together.

If your pet is pregnant, nursing or if you plan to breed your pet

Storage and Warnings:

Store at controlled room temperature below 25°C (75°F).

For external animal use only.

Remove the collar before bathing or swimming as the collar will not work when wet.

Avoid getting it in your animal's eyes, ears or mucous membranes.

Wash hands after use.

Keep this and all medication out of reach of children and pets.

Call your physician immediately if this product has been accidentally ingested.

Potential side effects:

This product is usually well tolerated

If you notice anything unusual including any signs of skin irritation, redness or a rash, contact your veterinarian

This short-acting product should stop working within 24 hours

Can this product be given with other drugs?

Yes, but possible interactions may occur when using Skin Calming Topicals in conjunction with other topical medications

Do not give new food or medications without first talking to your veterinarian

If your pet experiences any unusual reactions when taking multiple medications, contact your veterinarian

What else should I know?

Notify your veterinarian if your animal's condition does not improve or worsens despite this treatment.

As with all prescribed medications, Skin Calming Topicals should only be used on the animal for which it was prescribed. Skin Calming Topicals should also only be used for the condition for which it was prescribed, at the prescribed dose, as directed by your veterinarian.

This is just a summary of information about Skin Calming Topicals. If you have any questions or concerns about this product, please contact your veterinarian.
